

EDUCATION

Jabalpur Engineering college Masters of Computer Application – Computer Science. Courses: Operating System, Data Structure, Analysis Of Algorithms, Artificial Intelligence , Machine Learning, Networking , Database.	Jabalpur, India July 2024-2026
--	-----------------------------------

SKILLS SUMMARY

- Languages:** Python, Java, Scala, JavaScript, C, C++.
- Big Data & Processing :** Apache Spark, PySpark, Apache Kafka
- Database :** MySQL, MongoDB, NoSQL, Data Lake.
- Frameworks :** Django, Flask, Node.js, Tailwind CSS, Streamlit, React, Express.js.
- System Design :** Distributed System, Microservices, Event-driven architecture.
- Tools :** AirFlow, JIRA, Apache Beam, REST APIs, Confluence.

EXPERIENCE

Placement Coordinator Managed end-to-end logistics for the Infosys Recruitment Drive at JEC Facilitated communication between technical teams and student applicants	September 2025-April 2026
AI/ML Intern Badkul Technology Assisted in developing and training machine learning models to solve data-driven business problems. Performed data preprocessing, feature engineering, and model evaluation to improve system accuracy.	Nov 2025 - Dec 2025
Web Development Intern Cognifyz IT Solutions Executing frontend and backend tasks to build responsive web applications using modern frameworks. Collaborating on UI/UX enhancements and ensuring cross-browser compatibility for client projects.	May 2026 - Present

PROJECTS

Job and Career Recommendation System Description: Developed an intelligent recommendation engine that analyzes user skill sets, interests, and academic background to suggest the most suitable career paths. Key Addition: Implemented advanced logic to bridge the gap between student profiles and industry requirements. Designed multi-level Data Flow Diagrams (DFD) and ER Diagrams to ensure scalable system architecture and seamless data navigation.	April-2025
Student Database System Description: Built a centralized database management system to handle large volumes of student information, including grades, attendance, and personal records. Key Addition: Optimized data retrieval speed by implementing indexed queries in MySQL. Focused on Data Integrity and Normalization to eliminate redundancy and ensure high security for sensitive academic records.	July-2025
Aarogya Connect-Smart Healthcare Web App Description: Developed a smart healthcare platform designed to bridge the gap between patients and healthcare providers through AI-driven digital solutions. Key Addition: Integrated an AI-powered symptom analysis engine and a seamless appointment scheduling system. Utilized Django for a robust backend and React with Tailwind CSS to deliver a highly responsive, user-centric interface focused on accessibility and data security.	April-2026
Holographic AI Assistant Description: Engineered a cutting-edge AI assistant that merges physical hardware with advanced software to create an interactive holographic display experience. Key Addition: Developed the core interaction logic using Python and integrated real-time voice-command processing to enhance user engagement. Designed the unique visual projection system, successfully synchronizing physical hardware components with real-time AI response capabilities.	March-2026

HONORS AND AWARDS

- Placement Leadership:** Awarded a certificate of appreciation for coordinating.
- Placement Coordinator Role:** Appointed as the placement coordinator at JEC recognizing leadership and organization skills.
- Skill Badges:** Earned Python (Basic/Intermediate) skill badges on hacker rank/LinkedIn.

SOFT SKILLS

- Stakeholder Management:** Experienced in professional communication with corporate HRs.
- Analytical Thinking :** Strong debugging and logical reasoning capabilities.
- Adaptive Learning :** Quick to pick up new framework and industry tools.
